NEW... FASCINATING... EASY TO USE

Bucilla MAGIC-LOOM

There's "magic" in the Bucilla Magic-Loom. It is a gadget you'll love to work with! Its all-plastic construction and smooth finish makes it light and easy to handle while specially designed teeth with slight projections on their tips speed up weaving and prevent the thread from slipping off.

With it you can create lovely afghans, doilies, carriage covers, bedspreads, even toys for kiddies and a host of many other things.

Bucilla MAGIC-LOOM

So Exciting and Easy to Use

Want to make a flock of new things for your home, for yourself, or the kiddies? Do you have a gift problem? Then weave them yourself on the BUCILLA MAGIC-LOOM. There’s no end to the lovely things you can own—at half the cost, too—for with this new loom, you actually use less yarn than in any other form of Art Needlework.

With the Bucilla Magic-Loom, you get a specially designed weaving needle and the clever Adjusta Bar that enables you to make four different size motifs that you can combine into a wealth of fascinating designs!

Even the Children Can Weave on It!

Even the children will love to weave on the Magic-Loom. It is educational and perfectly safe as there are no pins to hurt their little fingers.

Start today to make a stunning creation on this smoothly finished, all-plastic loom—the weaving will go like the wind! And more good news—the BUCILLA MAGIC-LOOM is so compact that you can tuck one into your purse and do your weaving wherever you go!

When buying yarn for the Bucilla Magic-Loom, remember that it takes approximately 9 yards of any yarn to weave each 4 inch by 4 inch Motif.
How to Weave on the Bucilla Magic Loom in Four Easy Steps

Follow these instructions carefully and exactly, refer to illustrations often and you will be rewarded with a finished product of which you will be justly proud.

Turn Bucilla Magic Loom so that side with ¼ inch slit at lower left faces you. This will be called "Side 1" (see Fig. 1).

FIRST STEP—Tie a slip knot near end of yarn. Anchor knot behind slit (Fig. 1) and lay yarn BETWEEN first 2 pins at left of side 1 (see Fig. 1). Draw yarn to opposite side (Side 3) and from left to right AROUND first 2 pins at left of side 3 (see A in Fig. 1). Note that every 3rd pin (guide pin) around Magic Loom is longer at the bottom. Continue laying yarn as illustrated, always skipping 1 short pin and circling 1 long and 1 short.
pin. FOLLOW Fig. 1 EXACTLY, USING ONLY ENOUGH TENSION TO KEEP YARN ON PINS (WEAVING IN FOURTH STEP WILL TIGHTEN YARN. WHEN WEAVING WITH NEEDLE THREADS SHOULD BE PULLED THROUGH LOOM SLOWLY AND STRAIGHT IN LINE WITH EACH WOVEN ROW.) At end (see B in Fig. 1), encircle last long pin on Side 1 and first short pin on Side 2.

SECOND STEP—Turn Magic Loom so that Side 2 (see Fig. 1) faces you. Continue (from B in Fig. 2) as in First Step, FOLLOWING FIG. 2. At end (see C on Fig. 2), encircle 2 corner pins as before.

Ask your favorite dealer for the latest Bucilla Magic-Loom book, featuring afghans, bedspreads, carriage covers and infants' wear as well as their newest book of the loveliest Children's toys.
THIRD STEP—With Side 3 (opposite Side 1) facing you, continue as before to D on Fig. 3. (If you have wound correctly, each short pin on Sides 1 and 3 will have 1 thread around it and each long pin will have 2 threads around it; check this before continuing.) You now have 3 layers of yarn, the first and third layers are parallel to each other and the second layer runs crosswise between them. To measure yarn for Fourth Step (weaving), * do not cut yarn, wind yarn 5 times around outside of pins. Cut off at this point. Unwind this measured yarn and thread needle. You are now ready for Fourth Step (weaving).

* If 2-color effect is desired, cut yarn at * (Fig. 3); tie new color to cut end at D and measure as before.
FOURTH STEP (Weaving) see Fig. 4—Row 1—With Side 3 facing you, insert needle between first 2 (short) pins on side 4 (D in Fig. 4), then weave under first thread (first layer), over second thread (third layer), under third thread (first layer), over next thread (third layer); continue in this way across; at end, needle will be under outside loop at E. Draw yarn through. This is your first woven row. Row 2—Turn Magic Loom so that Side 1 faces you. Following arrow go around first 2 pins on Side 2 (1 long and 1 short pin), then over first, under second, over third; across row; at end, needle will be over outside loop at F in Fig. 4. Row 3—Go around next 2 pins, continue as row 1 to G in Fig. 4, (needle under outside loop.) Continue in this way until you have woven 16 rows (each odd row, end as row 1; each even row, end as row 2.) Row 17 (Last row, see Fig. 4)—Go around last pin on Side 4, continue as row 1, (weaving needle next to pins of Side 1). Before removing Motif from Magic Loom untie slip knot, weave
TO JOIN MOTIFS

Weave together as shown

both loose ends back through 3 or 4 threads. After all weaving is finished adjust the strands to parallel positions. It is necessary that this adjusting be done while the Motif is still on the loom. The threads will seem to be too far apart, but immediately upon removing the Motif from the loom these openings will close up, giving you a closely woven fabric. To remove Motif from Magic Loom, slide needle under all threads next to inside of pins and lift off. Repeat on all sides. You now have 1 Motif in Plain Weaving.

ADJUSTA-BAR

In addition to the 4x4 Motif, the Bucilla Magic Loom makes it possible for you to weave 3 other sizes of Motifs on the one loom. To weave a 1x4 Motif, insert Adjusta-Bar in groove A-A and proceed as before, only substitute Adjusta-Bar for Side 3. For a 2x4 Motif, use Adjusta-Bar in groove B-B. For a 3x4 Motif, use Adjusta-Bar in groove C-C and substitute Adjusta-Bar for Side 4.
DESIGN WEAVE

It is very simple to work a lovely Design Weave. Complete First, Second and Third Steps as for Plain Weave; then work Fourth Step as below. (Note: U means Under, O means Over. U1 means weave Under 1 thread, O3 means weave Over 3 threads.

[ ]—Stitches within brackets are to be worked the number of times indicated. Example: [O1, U3] 3 times, means O1, U3, O1, U3, O1, U3.)

Row 1 [U1, O1] across row; end, U1.
Row 2 [O1, U3], across row; end, O1.
Row 3—U1, O1, [U3, O1] 7 times; end U1, O1, U1.

Repeat rows 2 and 3 alternately to last row.
