The weaving instructions on this page, are by necessity abbreviated, and your attention is directed to their interpretation: 1R (first row), 2R (second row), etc.; W (weave), U (under), O (over). You will find it easy to weave special designs if you follow these directions.
JOINING SQUARES

The garments in this book are sewed together with an over and over stitch. This is done by placing two squares together not matching exact ends. With the single yarn left on Weave-It square after weaving, sew with an over and over stitch. The loops interlock instead of matching. Sew only in the loops. Stitches outside the loops will make holes and uneven places.

In sewing strips of squares together, reverse opposite ends and sew same as matching of squares. Sometimes it is necessary to take extra stitches in corners. This prevents any open spaces. When using a new thread for sewing, weave the loose end an inch down on the wrong side. Draw needle through first two loops (at edge, one on each side) and tie a slip knot. This prevents squares from coming apart. Do the same when ending the sewing of squares. All loose ends should be worked in on the wrong side.

PRESSING

Pressing the garment is very essential. Before assembling the different pieces of any garment, press on wrong side with a damp cloth and hot iron. Press again after assembling is finished. Dotted lines in the directions indicate darts and seams. All darts and seams may be stitched on machine. Before cutting away extra points and edges, stitch ¼” from seam to insure against raveling. When this is done, it isn’t necessary to buttonhole stitch or crochet the edge.

SIZES

To reduce or enlarge patterns

Most of the patterns in this book can easily be adjusted to a smaller or larger size by adding extra squares in front and back of blouse and skirt and many times at the underarm seams. Often Junior Weave-It Squares are sufficient for enlarging or reducing sizes. If the garment seems long a hem may be taken by folding part of square and stitch. It is necessary to take larger darts in shaping the garment for smaller sizes.
